# Top Tips

Keep **children at the centre** of all that you do.

Think child **not** disability.

Consider the needs of the parents but **not** to the detriment of the child.

Think Chronologies-build a chronology by recording significant events in your setting; develop **integrated chronologies** with partners.

Use **language** that the child is most familiar with.

Use **advocates and specialists**-don't just use who the family thinks knows the child best.

**Build relationships** with the child and the family.

**Observation** is an essential tool—observe behaviours in different environments.

**Communicate** your concerns and anxieties to partners, do something.

**Be enquiring be brave be challenging**—don't be afraid to escalate.
