Graduated pathway of Early Help and Support is now live!

We are very excited to tell you that the developed Graduated Pathway of Early Help and Support and supporting tools for all children with additional needs goes live today, **Monday 31st October 2016**.

All information about the Graduated Pathway including the tools, templates and guidance can be found on the [Glofamilies Directory](#).

To support use of pathway from today, we want to let you know of some arrangements in place:

- A new [Information for Practitioners](#) section on the Glofamilies Directory has also gone live providing a centralised point of reference for professionals. Practitioners have the option to register with Glofamilies Directory, enabling them to access additional information that is hidden from public view. To do this, please follow the instructions [here](#)
- The Awareness sessions for practitioners are booking up fast. If you have not already booked a place, please see [here](#) for dates and how to secure your place.
- We have also developed a range of Early Help training modules which can be found [here](#).
- We have developed a 'Notification template' for partners to record support they are providing to children to bring together all activity being provided to specific children and their families. Further information can be found [here](#)

The [SENCOSPOT](#) website will remain and where appropriate link to the Glofamilies Directory. The [Early Help webpage](#) has

been updated and references to the [Glofamilies Directory](#) for all information on the graduated pathway.

We would like to say a huge thank you again for your contribution in developing this pathway. We will continue to provide regular updates to developments to the Graduated Pathway. If you have any queries about the graduated pathway or supporting tools, please contact earlyhelppathway@gloucestershire.gov.uk
